

eZee NextGen Service Pack –6.1.170.005

Release Date: 17th June, 2016

A quick guide on how to install Service Pack

1. Take the latest backup of the database from server machine.
2. Close all eZee applications before executing the Service Pack.
3. Execute Service Pack on server machine first if the software is installed in a client – server environment.
4. Repeat the same process on all client terminals where eZee software is installed.

EZEE BURRP!- ENHANCEMENTS

POS-3457

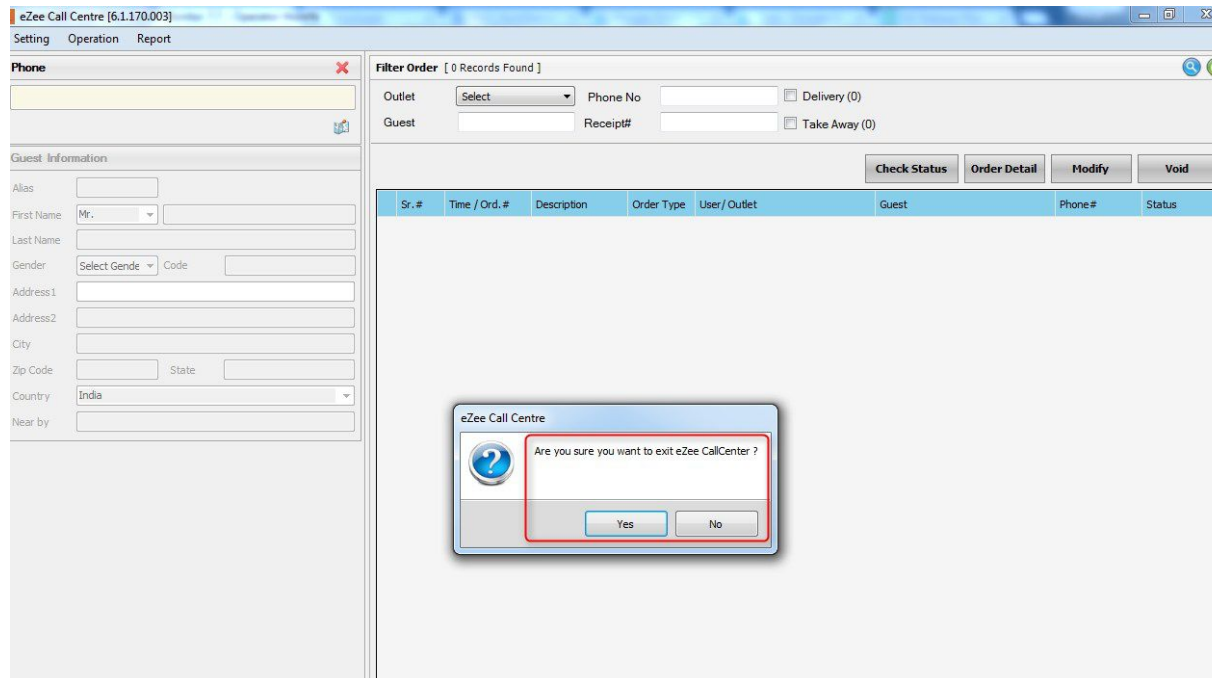

Description: When we do driver out from Call center Order list, system will print a receipt template which is a merged receipt, rather than printing an individual receipt template.

POS-3317

Description: Now, from this version of eZee BurrP!, for easier payment options, Verifone Payment interface will work with Touch-Technique and Chip.

POS-3459

Description: Previously, on closing the call center application, the system did not intimate the user with any kind of messages. Therefore, to save you from the consequences of incorrect clicking of buttons, once we close the call center application, the system should show a pop-up message asking for confirmation to close the application.
